MTX Accelerator

LEARNING MANAGEMENT SYSTEM

KEY FEATURES

- Branded learning portal for internal and external communities
- Salesforce integration to measure training effectiveness
- Content management system including support of SCORM content
- Intuitive course and training path building
- QRIS Capabilities
- User-friendly forums and chat for learner collaboration
- Course calendar
- Dynamic reports and dashboards
- Built-in gamification to promote participants engagement while learning

Built on the Salesforce Lightning Platform, the MTX Learning Management System is a scalable cloud-based training system that enables organizations to build custom learning environments, author interactive learning experiences, and deliver customized training tracks to partners, employees, and customers.

BENEFITS

- Increase user adoption by 85% with a connected community
- Configure learning track and auto-enrollment templates for rapid deployment without IT support
- Promote collaboration using Salesforce Chatter within courses
- Streamline onboarding and learning track with automated and pre-configured templates to drive desired outcomes
