MTX Product

ELECTION CANVASSING APPLICATION

The **Canvassing App** uses ESRI mapping solutions to simplify routine canvassing requirements, and reduces manual efforts to a great extent.

The MTX Canvassing takes advantage of ESRI mapping solutions so that users can create events, assign locations and deploy canvassers effectively and efficiently. It enables rapid deployment for time critical missions and responses.

**KEY FEATURES**

- Conduct surveys online or offline
- Custom cases
- Map access for tracking and canvassing

**BENEFITS**

- Combines best of breed technologies (Salesforce, ESRI, DocuSign) in one interconnected package.
- Out of the box robust functionality, combined with scalability to allow configuration and customization to support critical business needs.
- Agency administration to create assignments and allocate appropriate locations through an intuitive interface, and visually see assigned regions.
